Dr. Armin Rosencranz  
Dean  
Jindal School of Environment & Sustainability  
India

Through: Prof. Tarini Mehta

Re: Congratulations and Gratitude

Dear Armin, Tarini, Raj, and friends,

Greetings from the Normandy Chair for Peace. We write to congratulate and thank you for putting up the wonderful Jindal School of Environment and Sustainability. It is a watershed moment not only for India, but most probably for the world. A true lighthouse of hope.

*We will have peace on Earth when we have peace with the Earth. And we will change the story of the world when we change the storyline.*

## A New Pathway

Almost everything that happens in the world is not bad. Much of it is even good. But why do we only hear of the bad and the sad? Because bad news sells?

It is time to change the story of the world by changing the storyline.

May we share with you this new pathway to search for good stories of people making peace with the Earth. Together, we can shine the spotlight on the good, the right, and the bright.

We would like to cooperate with you and the good JSES on how we can together tell a new story of the world. Together with you, Professors Raj Kumar, Cosmin Coredea, and Tarini Mehta, we will start a new pathway to change the story of the world by changing the storyline.

We are planning a "World Concert of Good Stories" to celebrate the good that people are doing to care and have peace with the Earth. It will be on October 24, 2020, Saturday. The day also happens to be the 75th Anniversary of the founding of the United Nations. May we ask you to help us search for a handful of good stories in Asia, particularly in South Asia. This is one way we can cooperate with your school.

Here is a short concept film. [See link.](#) For the planned World Concert of Good Stories, please see attached letter to our co-workers around the world.

## CPR Economy

We are excited to cooperate with you and our dear Gus Speth on the walk to a new world of Economics -- the CPR economy. This is to Care, Protect, and Restore the vital organs of the Earth – The Land, Air, and Waters (LAW) of Life. As you may know, Gus has been on this path for decades. In the UK, they call it New Economy. It is also called Green Economics, Climate Capitalism, Natural Economics, Sustainable Development, etc. The word CPR is maybe more handy - because the name itself describes what we need

to do – to conserve, preserve and restore the LAW of Life. It is also the Cardio-Pulmonary Resuscitation of the gasping vital organs of Life on Earth.

The simple message is really that,

***“The nature of business must be the business of Nature.”***

We look forward to cooperating with you - Armin, Tarini, Raj, Cosmin, MC, and friends in India. It is not a coincidence that India is the birthplace and home of the great spirit -- MK Gandhi.

We pray that this letter finds you in good health and spirits.

Sincerely,

Tony Oposa
